C - Way

Power Stone
From Embedded Systems to networking, from hardware drivers to legacy games, C has shown versatility and functionality. This event in 3 eloquent rounds is aimed to test how good our participating C-Farers are at implementing them.

**THEME**

Here, in the C-Way universe, you all will get a chance to be a part of the MCU! We all wanted to become an Avenger someday be it Iron Man, Thor, Captain America or Black Widow. But in the universe of C-Way, you all will wish to become THANOS!

As you are in the search of power stone on Xandar, your main aim is to destroy half of the population of this C-way universe by using the power stone. And to achieve this, the stone needs to be protected.

The Avengers always win, but in the C-Way universe it can be different!

THANOS will have a big advantage over Avengers as he initially possesses the Power Stone.

We have to see whether Thanos wins or The Avengers somehow struggle and survive the C-Way universe and win!

**RULES**

- All the instructions provided by the organisers should be followed as closely as possible and any attempt to work around them should be avoided.
- Judgment of the event head is final and unquestionable.
- Any information other than once mentioned below will be given on the spot.
- No Cheating would be Tolerated since Stan Lee wouldn’t like it!
ROUND 1

Nova
You all are on the planet Nova and you all have to solve a set of Multiple-Choice Questions. The power stone needs a master who is the best. So, the top participants of Round 1 will become THANOS and the rest will be The Avengers.

Gameplay:
• Your scores will be carried forward.
• Only 15-20 participants will move forward to Titan.
• Each of you will get 15 minutes to complete the task.

ROUND 2

Titan
You will have a shuffled code and the correct output. For the shuffled code, you have to write the correct sequence of the code that produces the expected output.

Gameplay:
• THANOS can use the Power stone to make the Avengers disappear. And he can change 5 lines in Avengers’ codes.
• THANOS will get 1 minute to carry out changes in Avengers’ codes.
• If he comes back in 1 minute then he is safe and if not, then he will suffer the consequences (Because with great power comes great responsibilities).
• If an Avenger solves the errors and completes the code before THANOS then the power stone will be given to that particular Avenger and this will affect the scores.
• Each of you will get 20 minutes to complete the task.
• Only 5 participants will move forward to the next round.
• THANOS cannot use the Power stone in the last 5 minutes of this round.
ROUND 3

The Final Fight

Here you will have scenarios and are expected to solve the problems through powerful coding. You will have to fight using your coding skills.

This Final Fight would determine whether an Avenger defeats Thanos and gets the Power Stone, or Thanos achieves his goal.

Gameplay:

- The goal of the Avengers and Thanos is to write codes which are short and accurate and finish it as quickly as possible.
- Scores will be assigned based on the accuracy of the result, and the memory used.
- The twist here is that the monitor will be on for 5 minutes and off for 3 minutes.
- Each participant will get 25 minutes to complete the task.
- It is the final round and the owner of Power stone in this round would have special Powers.
- The Power will be announced on the spot.

Tie Breaker Round : Face off

In case of a tie, Power stone holder will move forward.
If both the candidates have Power stones then there will be an extra round.
This round will be announced on the spot.
